Before

After

In general the project involved design and construction of the following works:

- 54 residential lots
- 1,150 m of asphalt roads and drainage ditches
- Stormwater detention system
- 1,500 m of 150 & 200 mm dia watermain
- 1,100 m of 200 mm dia PVC sewer main
- 15 sanitary manholes
- 54 water and sewer services

Keewatin-Aski Ltd. provided the required planning, detailed design, tender administration, construction contract administration and full-time on-site inspection services for the subdivision. The work was tendered and constructed in 2012/2013.
